

Future-to-Spot Service extension to Hungarian Power market

Dear trading participants,

European Energy Exchange AG (EEX) will extend the Future-to-Spot Service (FTS Service), which is offered in cooperation with EPEX SPOT, to the Hungarian Power market area.

From **22 December 2025** onwards, trading participants active on both EEX derivatives and HUPX Day-ahead markets, can use a synergy of both markets and enter bids in the Hungarian Day-ahead auction of HUPX according to their corresponding position in EEX-PXE Hungarian Power Month or Week Futures. The first possible delivery period to be executed in this service will be the calendar week 01-26 for EEX-PXE Hungarian Power Week Futures and January 2026 for the EEX-PXE Hungarian Power Month Future.

The service will be possible via the automatic EEX Initiation Service. A prerequisite is a dedicated MATS portfolio which can be requested at EPEX SPOT via fts.service@epexspot.com. A subscription to the Initiation Service can be done by sending the filled-out Service Order Form and the Appendix to EEX Market Operations via trading@eex.com. A manual submission of bids will not be possible.

For any questions or further details, please contact EEX Market Operations.

Yours sincerely,

Market Operations
