## Know Your Customer Analyst (f/m/d) Member Readiness

### Your tasks:

Your responsibility is to perform background checks on new clients and execute the KYC screenings and scoring. You need to identify accounts for high risk and prepare recommendations to the management by documenting and verifying the information obtained as required by the KYC Policies and Procedures. On demand you assist the Compliance department, Legal and Market Surveillance teams with ad-hoc requests, data collection and inquiries. You review AML, KYC and other regulatory requirements for all clients on a regular basis. Furthermore, you maintain detailed records on clients for second-level review and support internal and external auditors. Overall you will help to improve the process of KYC and AML data collection and, of course, receive a great deal in return for your outstanding performance from your team. After all, we value the exchange of ideas, being there for each other and encouraging each other to become better. We call it: the exchange mindset.
